Aluminium handle

- **Application: PVC, wood**
- Standard spindle length: 35 mm
- Available colours: white, bronze, gold/caramel, silver/grey, titanium, cream, matt black, anthracite

Due to the plasticity of the material, aluminium handles can be shaped freely, even into the most modern forms. As a result, in addition to their functionality, handles made of aluminium are also decorative. The mechanisms used significantly facilitate opening and closing without the need for force and allow for locking mechanisms.

The handle is available with a key for selected spindle lengths and colours.

Can be used as a centre handle (short spindle version).
