Commeo Send portable remote controls

- **Manufacturer: Selve**
- Number of channels: 1–32
- Frequency: 868.1 MHz
- Power supply: 2x AAA battery / 1x CR2032 (depending on the model)

Selve Commeo Send is a family of bi-directional transmitters that allow for the convenient control of roller shutters using radio waves. You can choose from very simple devices operating a single roller shutter or a group of them, as well as advanced remote controls that provide control on the level of complex smart home systems. The most advanced remote, the Commeo Multi Send 32, is recommended as the first step into the world of advanced home automation systems.

Commeo Send remote controls are made of high-quality materials, fitting into any interior thanks to their minimalist black and white aesthetics. They have been designed to fit comfortably in the hand, and their use is fully intuitive. The large, accessible buttons cause no trouble even in low light conditions.

Discover the Selve Commeo Send remote controls

Commeo Send 1 Basic is a simplified alternative to the Commeo Send 1 remote, focusing its design on the easiest possible operation of basic functions.

- The most intuitive operation among all remote controls
- Simplified programming without group division
- Feedback signal indicated by a DUO LED diode
- Wall or desk mount included

Commeo Send 1 is a standard solution designed to operate a single roller shutter or a group of them.

- Ergonomic buttons are easy to use even without looking at the remote
- The AUTO/MAN slider allows switching between automatic and manual roller shutter operation modes
- Requires a pair of AAA batteries for power, replaceable without special tools

Commeo Send 10 is the ideal solution for controlling roller shutters throughout the house or in a large room, if the household members want to set them individually. It can operate up to 10 window coverings or their groups.

- Ergonomic buttons allow for easy operation even in limited lighting
- A large, numeric channel display indicates the devices the remote is currently controlling
- The AUTO/MAN slider allows switching between automatic and manual roller shutter operation modes
- Requires a pair of AAA batteries for power, replaceable without special tools

Commeo Key Send 3 has a shape similar to so-called keychain remote controls for garage doors, carried in a pocket or on keys. It can control garage doors, but its primary application is operating roller shutters.

- Fully intuitive operation even without taking it out of your pocket
- Feedback signal indicated by a DUO LED diode
- Simplified programming without group division

Commeo Multi Send 32 is a powerful tool capable of practically replacing a smart home system. This handheld transmitter supports up to 32 channels, features a large, easy-to-read display, and for convenience, its configuration can be performed on the screen of a computer connected via USB.

- Supports 32 channels, 16 groups, and 4 timers for each group, providing a full range of premium features at no extra cost
- Allows for freely configuring groups and assigning them custom names for better clarity
- A large, clear display allows reading data from sensors in the motors and those independently connected to the remote, and also displays text feedback messages
- Supports autonomous programs based on sensor data, astronomical programs, holiday programs, and user-defined programs
- Supports a calendar, which translates to the automatic implementation of summer and winter time, as well as the identification of holidays and other non-working days
- Requires a pair of AAA batteries for power, replaceable without special tools
