Dexxo Pro RTS

- **manufacturer: Somfy**
- available in 800N and 1000N versions
- drive ready to work iin less than 90 seconds
- easy programming and diagnostics (Set&Go and Serve-e-Go)
- compatible with TaHoma® switch: easy remote control of devices via the Internet
- versatile accessory and security compatibility

The Dexxo Pro RTS sectional garage door drive is a brand-name device valued by both installers and users. It is ready to work within dozens of seconds after installation, and the Somfy ecosystem of tools makes servicing and maintenance easier. Users, in turn, value it for its smooth operation, compatibility with multiple remote controls, and integration with smart home systems.

Why you should recommend the Dexxo Pro RTS:

- it is a proven solution from a reputable manufacturer and is successfully used in a huge number of garages
- it can be controlled by wall-mounted or portable remote controls, adapting to the user's needs
- it allows access to Somfy tools for installers, which significantly facilitates the identification of faults reported by customers

Choose the Dexxo Pro RTS if your customers:

- are looking for a proven solution they can trust and use for many years
- are planning to equip their garage door with accessories that improve safety, such as photocells
- already have other Somfy operators, not just for garage doors, and are planning to integrate them all within a single smart home system
