Elero ROLSOLAR/D+ 868 DC

- **manufacturer: Elero**
- Plug&Play motors
- built-in 868 MHz two-way radio receiver
- armour detection and protection against destruction in both directions
- power supply: 12 V DC
- slow approach to the end positions
- power: 48–72 W
- speed: 16 rpm

ROLSOLAR/D+ 868 DC roller shutter motors.

Plug&Play version: The motor automatically detects the end positions and remembers them after installation. The electromechanical silent brake increases the comfort of use.

Elero ROLSOLAR/D+ 868 DC is equipped with electronic limit switches set automatically. The control is carried out using Elero remote controls and transmitters or the NiceSmart control unit. The motor works with a solar panel with a power of 4.2 W, IP64 protection and dimensions 470(455)X60 and a NiMH battery, battery rated voltage (V) 12.0, battery capacity (Ah) 2.1.

The offer includes motors of different power, adapted to the size of the roller shutter.
