External wooden shutters

- **FSC™-certified pine and oak timber available on request**
- mounting on an additional frame
- custom-made
- louvres set at a fixed angle
- painted in RAL colours

External wooden shutters are an original window complement that allows control over the amount of light and heat entering the interior. This privacy-assuring solution can completely transform any façade.

Key Features of External Wooden Shutters:

- made from natural, eco-friendly wood, giving the façade an elegant character
- features fixed-angle louvres that block excess heat and allow free airflow
- custom-made according to customer expectations

Choose external wooden shutters if:

- you care about the environment and prefer to surround yourself with natural materials
- you appreciate the elegance of wood finished with intense RAL colour paints
- you're looking for unique solutions that reflect traditional aesthetics or Mediterranean architecture
