FORCA AM45-MEL-P-R-E

- **motor diameter: 45 mm**
- control: radio
- frequency: 868 MHz
- limit switches: electronic
- obstacle detection
- frost detection
- automatic correction of limit positions every 100 cycles
- nominal rotation speed: 17 rpm

The **FORCA AM45-MEL-P-R-E** is a short motor designed to drive narrow roller shutters. It runs quietly, so the occupants enjoy peace and quiet.

This motor is the compact equivalent of the FORCA AM45-R-E and has all the essential functions of the larger model, including electronic limit adjustment and advanced obstacle detection.

Why recommend the FORCA AM45-MEL-P-R-E motor:

- It is a compact, fully featured version of the AM45-R-E – easier to handle and perfectly sufficient for small shutters.
- Thanks to the included adapter it works with both 50 and 60 mm roller tubes, covering both scenarios.
- It gives the customer comfortable control even from a long distance, so the installer will never be blamed for a remote control with too little range.

Choose the FORCA AM45-MEL-P-R-E motor if your customer:

- Expects effective protection against the consequences of the shutter touching an obstacle, including the curtain freezing to the windowsill.

- Does not want to be bothered by over-sensitive safety features – with adjustable sensitivity, the motor will not stop without a good reason.
- Wants to build an advanced home automation (smart home) system, to which the FORCA AM45-MEL-P-R-E will always report its exact position.

Discover the FORCA AM45-MEL-P-R-E motor in detail:

- Motor diameter: 45 mm
- Control: radio
- Frequency: 868 MHz
- Limit switches: electronic
- Obstacle detection
- Frost detection
- Reversible direction of rotation
- Automatic correction of limit positions every 100 cycles
- Nominal rotation speed: 17 rpm
- Torque (motor power): 6 or 30 Nm
- Nominal power (depending on torque): 130 W
- Tube length (depending on torque): 376 mm
- Power cable: 2.5 m
- Protection rating: IP44
- Included: adapter and drive for 50 mm tube
