FORCA AM45-R

- **motor diameter: 45 mm**
- control: wired
- limit switches: electronic
- obstacle detection
- frost detection
- automatic correction of limit positions every 100 cycles
- nominal rotation speed: 17 rpm

The **FORCA AM45-R** is a classic wired roller shutter motor, enhanced with extra features that improve its smoothness of operation and the safety of the cover. It detects frost and responds to obstacles preventing the shutter from working normally (5 levels of obstacle detection sensitivity).

It offers an excellent balance between features and price.

Why recommend the FORCA AM45-R roller shutter motor:

- Installing the FORCA AM45-R is no challenge for the fitter, as it is a classic wired motor.
- Programming is quick and intuitive, using a wall switch or a setting cable.
- The motor is very affordably priced, keeping the overall cost of the window cover particularly competitive.

Choose the FORCA AM45-R motor if your customer:

- Needs a simple, economical wired motor and wants to keep the investment as low as possible.
- Wants to forget about manual limit adjustment thanks to the self-calibration function, which runs every 100 cycles.
- Is looking for modern safety features such as obstacle and frost detection to protect the shutter from potentially costly damage.

Discover the FORCA AM45-R motor in detail:

- Motor diameter: 45 mm
- Control: wired
- Limit switches: electronic
- Obstacle detection
- Frost detection
- Reversible direction of rotation
- Automatic correction of limit positions every 100 cycles
- Nominal rotation speed: 17 rpm
- Torque (motor power): 6, 15 or 30 Nm
- Nominal power (depending on torque): 130–200 W
- Tube length (depending on torque): 376–482 mm
- Power cable: 2.5 m
- Protection rating: IP44
- Included: adapter and drive for 50 mm tube
