Ilmo 3 50 WT

- **manufacturer: Somfy**
- "Plug&Play" drive – no adjustment required
- control: wired
- limit switches: electronic
- limit position adjustment: automatic
- obstacle detection
- frost detection on start-up
- available torque versions: 6, 10, and 15 Nm

The **Ilmo 3 50 WT** quiet, electronic wired drive for roller shutters is an evolution of its popular predecessor, the Ilmo 2 50 WT. It features exceptionally quiet operation and simple installation thanks to Plug&Play technology which enables automatic setting of the limit positions.

Why recommend the Ilmo 3 50 WT wired roller shutter drive:

- It ensures straightforward installation thanks to Plug&Play technology, making it ready to run immediately after fitting.
- It is equipped with frost and obstacle detection protecting from damage the drive, the shutter, and anything that might come into contact with it.
- It meets the requirements of the DIN 4109 standard for noise generation, ensuring it does not disturb the household's peace of mind.

Choose the Ilmo 3 50 WT wired roller shutter drive if your customer:

- Expects a high degree of reliability, guaranteed by the detection of potential threats to the shutter, and the fact that its presence can deter break-in attempts.

- Values the long service life of their window covers and their impeccable aesthetics, which is ensured by the automatic curtain release mechanism – a tense curtain could damage plaster or deform the roller shutter box.
- Prioritises silence and requires solutions that meet the latest standards in noise generation, surpassing many competing solutions in this regard.

Learn more about the Ilmo 3 50 WT wired roller shutter drive:

- Can be mounted on the left or right side.
- Features parallel wiring, preventing drive damage in case of incorrect connection.
- Nominal speed: 17 rpm
