IntelliTAG™ Air io

- **Manufacturer: Somfy**
- Compatible with: Tilt and turn windows
- Requires: TaHoma switch
- Adjustable vibration detection level
- Frequency (MHz): 868.95
- Power supply: 2 × AAAA battery

IntelliTAG™ Air io is a window opening sensor that can also function as part of an alarm system, detecting strong vibrations and acting as a tool to trigger advanced scenarios for window coverings. It is completely invisible when the window is closed or tilted, and battery replacement is usually not needed more than once every two years. It requires a TaHoma switch to operate.

3 most important features of IntelliTAG™ Air io:

- Detects and informs about the position of a tilt and turn window
- Detects strong vibrations that may indicate an attempted break-in
- Simple design, no impact on window aesthetics and universal application

Choose IntelliTAG™ Air io if:

- You want to be sure that you have closed the windows before leaving the house or that the rooms are ventilated when needed
- You want to protect yourself from burglars at minimal cost by receiving alarms when someone tries to force a window
- You are building a smart home system based on the TaHoma switch, in which advanced scenarios will take care of the comfort and safety of your family
