IRI.LAMP signal lamp

- **LED lamp**
- supply voltage 20–255 V (AC/DC)
- built-in antenna
- available lampshade colours: white, yellow

The IRI.LAMP LED lamp is a perfect complement to garage doors. It can be used as an element of modernization of older devices that already have the ability to signal their operation, or as an extension of the functionality of gates without such an option. It can be powered by a wide range of alternating or direct voltage, and its installation is facilitated by the included specialised hook.

The IRI.LAMP signal lamp has an extremely low energy consumption of 1 W. It is also capable of providing continuous light.
