- additional safety switch
- safety class: IP 54
- power: 115–156 W
- speed: 26 rpm
- lamella rotation speed 6 rpm

JA Comfort drives are one of the most popular solutions on the market due to their versatility. They are used in new investments and renovations of older facilities.

JA Comfort are valued for numerous solutions that increase their durability and ensure comfort of use. **Durable gear, built-in thermal protection, tight housing and an additional safety switch make them a product for years.** Slow motion mode, standstill recognition, automatic belt length compensation and, above all, the ability to

precisely set the slats, are responsible for the daily pleasure of having such a solution.

The drives are operated using wall switches, radio remote controls or Nice Smart modules.
