JA Soft NHK

- **manufacturer: Elero**
- emergency opening with a crank
- 0.5 m power cord with Hirschmann plug
- electromagnetic brake
- regulation of limit positions: manual
- additional safety switch
- safety class: IP44
- speed 26 rpm

The JA Soft NHK shutter drive has the option of emergency operation using a special crank. Thanks to this, it can be used to change the position of the blinds even during power outages.

It is equipped with mechanical limit switches set by using setup buttons, which ensures its universality and compatibility with many control panels of smart home systems. **It can be controlled as an element of smart home systems, with a radio remote control or wall switches.**
