LumeroSon-868 mini

- **manufacturer: Elero**
- two-way radio transmitter for operating screen blinds and venetian blinds
- controls 1 device or 1 device group
- portable device with a wall mount
- manual and automatic mode selection button
- frequency (MHz): 868
- power supply: 1xCR2450 batteries

The LumeroSon-868 mini is a radio transmitter for operating blinds and screen blinds, which will be most appreciated by those who don't like to part with their remote control. Its distinguishing feature is its exceptionally small size, allowing it to be held in the palm of your hand and easily carried, even in a pocket.

The LumeroSon-868 mini transmitter can operate a single device, a group of devices, or act as a central controller, making it a highly versatile solution.

Why you should recommend the LumeroSon-868 mini transmitter:

- It's significantly smaller than typical transmitters, which makes it stand out on the market.
- It can control an entire group of devices at once, meaning just one transmitter might be enough for multiple drives.
- It has a button to switch the drive to automatic mode, a feature not always found in devices of this class.

Choose the LumeroSon-868 mini transmitter if your client:

- Is looking for the smallest possible, portable solution that also has the option of wall mounting.
- Has window blinds with Elero drives, with which the LumeroSon-868 mini works best.

- Wants a visual confirmation of signals being sent, provided by a coloured LED light.

Learn more about the LumeroSon-868 mini transmitter:
