- bidirectional radio transmitter for controlling blinds
- controls 1 device or 1 group of devices
- portable device
- Slide control for precise adjustment of covers
- manual and automatic mode selection button
- frequency (MHz): 868
- power supply: 2xAAA batteries

The LumeroSon-868 Slide is a transmitter dedicated to external venetian blinds. It allows for the full potential of this type of window cover to be utilised thanks to the Slide control, which enables the user to set the slats at an angle that perfectly suits their needs.

The LumeroSon-868 Slide transmitter is an extremely handy device. In addition to being used as a typical portable remote, it can also be placed vertically or stored in a special wall mount, which is part of the installation kit.

Why you should recommend the LumeroSon-868 Slide transmitter:

- It was created to operate external venetian blinds with an Elero/Nice drive, making it a perfect complement to covers that use such automation.
- Its simple, minimalist, and functional design makes the LumeroSon-868 Slide an aesthetic addition to a home's electronics.
- The very long battery life, even with intensive use, ensures that the transmitter is always ready for operation.

Choose the LumeroSon-868 Slide transmitter if your client:

- Has selected external venetian blinds with an Elero drive and now needs the perfect remote control system for them.
- Wants to fully utilise the capabilities of their blinds, which is only possible thanks to the functionality of the Slide control.
- Expects easy automation of their window covers, which is offered in the LumeroSon-868 Slide by the "i" button.
