LumeroSon W-868

- **manufacturer: Elero**
- bidirectional radio transmitter for controlling screen and venetian blinds
- controls 1 device or 1 device group
- wall-mounted device
- manual and automatic mode selection button
- frequency (MHz): 868
- power supply: 1xCR2450 batteries

The LumeroSon W-868 is a single-channel wall-mounted transmitter that can be used to control external venetian blinds and screen blinds. Its very simple design and compact size mean it will easily fit into the aesthetic of any room.

By choosing the LumeroSon W-868, the client gets a reliable solution with excellent ergonomics, and its operating time on a single battery can exceed even a year with a typical usage pattern.

Why you should recommend the LumeroSon W-868 transmitter:

- It is the simplest and most effective way to control blinds and shutters with Elero drives among solutions that allow the drive to be switched to automatic mode.
- It features intuitive operation and clearly marked buttons that can be recognised by touch alone, without looking at the device.
- It enables quick pairing with the appropriate blind, speeding up the initial installation and allowing the transmitter to be quickly assigned to another blind if needed.

Choose the LumeroSon W-868 transmitter if your client:

- Is looking for a simple and reliable solution that will never cause any trouble.
- Prefers solutions with a minimalist design that will fit any interior, regardless of its style.
- Wants to create a single place from which everyone can control the window blinds without having to wonder where the transmitter has been left.

Learn more about the LumeroSon W-868 transmitter:
