Master Pro Bitech photocells

- **manufacturer: Somfy**
- range in open field: up to 10 m
- adjustment angle: 180°
- degree of protection: IP44

Master Pro Bitech photocells are designed to work primarily with Somfy drives, but are also compatible with solutions from other manufacturers. These devices detect obstacles from up to ten metres away and allow the drive to stop immediately to prevent incidents. Their robust design, confirmed by IP44 degree of protection, guarantees splash resistance.

Key features of the Master Pro Bitech photocell:

- obstacle detection range up to ten metres
- large adjustment angle of the photocells covering a full semicircle (180°)
- watertight and splash-proof case

Choose Master Pro Bitech photocells if you:

- need a large photocell range, adapted to the operating conditions of your door
- use drives of different brands, compatible with Somfy technologies, and want to install photocells in all of them
- decided to buy Somfy drives and are looking for the best possible set of photocells
