MonoSon-868 mini

- **manufacturer: Elero**
- bidirectional radio transmitter for operating roller shutters
- controls 1 device or 1 device group
- portable device with a wall mount
- frequency (MHz): 868
- power supply: 1xCR2450 batteries

The MonoSon-868 mini transmitter is a single-channel handheld device offered with a frame that allows it to be placed on the wall. Its compact size means you can always have it with you, even in the smallest pocket, and the wall-mounted frame, which doesn't require an in-wall box, allows you to create a single place where household members can easily find the transmitter.

Why you should recommend the MonoSon-868 mini transmitter:

- It is significantly smaller than typical transmitters, providing the full convenience of a portable device.
- It has a signalling LED light that indicates the sending and receiving of signals.
- It features an intuitive design, thanks to which even guests usually don't need an explanation on how to operate the roller shutter with it.

Choose the MonoSon-868 mini transmitter if your client:

- Has roller shutters with Elero drives, for which the MonoSon-868 mini is one of the recommended transmitters.
- Wants both mobility and wall mounting, so they can have the transmitter with them when needed and always put it back in one place so it's never lost.

- Doesn't like to remember to replace batteries, which in the case of the MonoSon-868 mini shouldn't be necessary more than once a year.

Learn more about the MonoSon-868 mini transmitter:

- Designed to control 1 roller shutter or a group of them, including screen blinds.
- Compatible with solar drives and smart home devices using the same radio protocol, e.g., lighting and heating.
- Dimensions: 40x71x10 mm.
- Weight with battery: 27 g.
- Can be wall-mounted thanks to the included wall frame.
- Has an LED light to signal commands.
- Battery-powered: 1xCR2450.
- Battery replacement every 1 year (with 10 daily operating cycles).
- Protection rating IP20.
- Available in white and silver.
