Oximo 40 WireFree RTS

- **manufacturer: Somfy**
- Radio Technology Somfy (RTS)
- not compatible with sequential controls
- obstacle detection
- roller shutter icing detection
- protection against excessive discharge of the battery
- memory capacity for transmitters and sensors: 12 transmitters + 3 sensors
- control: wireless
- frequency (MHz): 433
- battery capacity (Ah): 2.2

Oximo 40 WireFreeTM RTS, hereinafter referred to as the set, is a three-piece roller shutter control set. It consists of an Oximo 40 DC RTS low power drive, a battery with Oximo WireFreeTM Battery controller and an Oximo WireFreeTM Solar Panel. The set works using solar energy from a solar panel. The energy from the panel is stored in a battery which in turn powers the drive. All wiring for 230 V 50 Hz installations is unnecessary. The set is based on Radio Technology Somfy (RTS). It is controlled by RTS transmitters and is compatible with RTS sun sensors
