# PUPILLA photocells

- **manufacturer: Beninca**
- available variant: PUPILLA.0C
- adjustment angle: 180°

The PUPILLA family of photocells has been developed for garage and industrial door operators manufactured by BENINCA. They are distinguished by their modern aesthetics, although it is their efficiency and easy installation that determine the popularity of this solution.

## Key features of the PUPILLA photocells:

- obstacle detection prevents collisions and other dangerous events
- LED facilitates precise centring of the beam
- large adjustment angle ensures photocell versatility

## Choose PUPILLA photocells if you:

- strive for maximum safety and minimum risk of accidents
- want the installation of a photocell on your door to be simple and intuitive
- plan to synchronise up to four pairs of photocells
