ROLTOP/D+ 868

- **manufacturer: Elero**
- Plug&Play motors
- built-in 868 MHz two-way radio receiver
- obstacle detection for both directions of movement
- replaceable power cord: 230 V/50 Hz
- power: 118–200 W
- speed: 14 rpm

ROLTOP/D+ 868 drives offer automatic end position detection, which enables them to operate in Plug&Play mode, i.e. start working immediately after installation.

The devices are controlled by radio remote controls or the NiceSmart control unit. **The drives offer radio signal routing, thus facilitating the creation of extensive smart home systems.**

ROLTOP/D+ 868 are characterised by high culture and work safet. **The electromagnetic brake is responsible for slow approach to the end positions**, and damage to the drive and the roller shutter curtain is prevented by the obstacle detection mechanism when moving in both directions.
