ROLTOP/D+

- **manufacturer: Elero**
- Plug&Play motors
- obstacle detection for both directions of movement
- replaceable power cord: 230 V/50 Hz
- speed: 14 rpm

ROLTOP/D+ are Plug&Play drives. They allow you to start working immediately after their installation. The installation process itself is simple, mainly due to replaceable power cord and automatic limit position setting.

Advanced solutions are responsible for the safety and smooth operation of the drives, such as detection of obstacles when rolling up and unrolling the curtain and an electromagnetic brake ensuring slow approach to the end positions.
