Secustik® Atlanta

- **Application: PVC**
- Standard spindle length: 32–42 mm (adjustable)
- Available colours: silver F1, gold F4, titanium F9, white RAL9016, brown RAL8007
- Available variants: standard, with push-button, with key

Secustik Atlanta series are some of the most popular handles on the Polish market. They have a precise 8-position gear allowing 45° rotation recommended for windows with the micro ventilation feature. Base security integrated into the handle lets the homeowners be sure that no undesired persons will be able to open the window.

The handle is available in key and push-button variants for selected spindle lengths and colours.
