Secustik® Luxembourg

- **Application: PVC, aluminium, wood**
- Standard spindle length: 32–42 mm (adjustable)
- Available colours: white RAL9016, brown RAL8077, cognac F4, silver F1, titanium F9, cream RAL9001, matt black 9714M, matt anthracite RAL7016M
- Available variants: standard, with key

The Hoppe Luxembourg aluminium window handle from the Secustik series is equipped with an 8-position gear, allowing the handle to turn by 45° as recommended for windows with micro ventilation. SECUSTIK® technology is a patented locking mechanism that prevents the window perimeter fitting from being displaced from the outside and thus opening the window.

The handle is available with a key for selected spindle lengths and colours.

Can be used as a centre handle (short spindle version).
