Selve SEE / SE Pro

- **Manufacturer: Selve**
- Motor diameter: 45 mm
- Control: Wired
- Limit switches: Electronic
- Obstacle detection
- Ice detection
- Rated speed: 17 rpm

Selve SEE and **SE Pro** are wired roller shutter motors operating in Plug & Play mode, which means that the window coverings are ready for operation almost immediately after installation. These are intelligent motors that automatically set their end positions without the need for manual adjustment. Furthermore, they can detect icing and contact with an obstacle during closing, reacting appropriately to these situations and protecting the roller shutter from damage.

The soft approach of the roller shutter to the cassette and the lower stopper ensures very high operating smoothness, while installation with locking hangers translates into a solid closure of the roller shutter, making it an effective barrier against intruders.

Choose the upgraded Selve SE Pro motor version if you:

- Are installing multiple motors, as the streamlined limit setting mechanism in Selve SE Pro will further shorten the time needed for commissioning.
- Need the highest level of roller shutter protection with increased sensitivity and faster response to any obstacles in the path of the roller shutter curtain.
- Plan a way to reduce the cost of the roller shutter by installing or using already existing flexible suspension springs.

Discover the Selve SEE and Selve SE Pro roller shutter motors in detail:

- Motor diameter: 45 mm

- Control: Wired
- Limit switches: Electronic
- Obstacle detection
- Ice detection
- Automatic reversal of motor direction (Pro version)
- Rated speed: 17 rpm
- Rated torque: 6, 7, 10, 15, 20, 30, 40 Nm
- Rated power (depending on motor power): 88–345 W
- Replaceable power cable: 2.5, 5 and 10 m
- Standby power consumption: Below 0.5 W
- Protection class: IP44
- Certificates: CE, VDE
