Situo 5 RTS

- **manufacturer: Somfy**
- The solar function is activated or deactivated using the group selection button
- group selection button
- control of up to 5 devices or 5 groups of devices in RTS technology
- number of channels: 5
- frequency (MHz): 433
- power supply: CR2032 battery

Situo 5 RTS is designed to control up to 5 devices or 5 groups of devices in RTS technology. Each time the button is pressed, the transmitter emits radio signals, the LED diode (diodes) on the remote control lights (light up) when the button is pressed (the signal emission lasts up to 10 seconds). The programming button is located on the back of the transmitter and allows you to save its address in one or more receivers. This is the pairing process - the "My" button allows you to define the comfort position of the device.
