Somfy Solus 2 PA

- **manufacturer: Somfy**
- minimum roller shutter width 620 mm
- designed for Ø 50 and Ø 60 winding tubes
- power supply: 230 V/50 Hz
- continuous operation time: 4 min
- manual adjustment of limit positions
- available motor powers: 6/10/15 Nm
- control: wired
- limit switches: mechanical
- power consumption (W): 90–120

Solus 2 PA is a new 50 series wired motor from the renowned manufacturer Somfy. This solution is especially recommended for basic smart home systems, which may be incompatible with devices offering automatic limit position adjustment and obstacle detection. In the **Solus 2 PA**, the adjustment is done manually. When using it, you can resign from the lock hangers and stoppers on the bottom strip.

The power of the motors can be easily adjusted to all typical widths and weights of the available armour.
