Swing gate operator BOB 3024

- **manufacturer: Beninca**
- maximum force: 1500 N
- opening time: 12"
- amperometric protection

The BOB 3024 swing gate operator is a device from the Beninca Turbo family, which features a very high opening and closing pace, operating smoothly and completely silently.

This highly advanced device boasts the narrowest actuator width on the market, facilitating its use on gates with wickets and those mounted on narrow posts. Moreover, it is compatible with emergency battery backups, ensuring convenient access to the property even during power outages.

The BOB 3024 swing gate operator is offered in a set with the TRUST24 control unit, STAR.O flashing light, a pair of PUPILLA photocells, and two TO.GO2A remote controls.

Why recommend the BOB 3024 swing gate operator:

- it can be easily installed on the narrowest posts due to its exceptionally slim design
- it features a very high operating speed, characteristic of the Turbo series operators – the gate opens in just 12 seconds!
- it has two adjustable limit switches for the opening and closing phases, ensuring full operational precision

Choose the BOB 3024 swing gate operator if your client:

- is looking for a solution that matches modern fence aesthetics – the operator comes in an elegant dark grey colour
- values energy efficiency, especially compliance with the latest European standards
- does not accept any interruptions in the operator's performance, which is prevented by the optional battery backup
