Three-channel RTS wall transmitter

- **manufacturer: Somfy**
- type: radio, wall-mounted
- number of controlled devices or groups: 3
- battery power supply: CR2430 (3 V)
- ingress protection: IP55

The three-channel RTS wall transmitter controls from one to three devices or groups of devices compliant with the RTS wireless standard in one-way communication, such as garage and property gates and selected window coverings.

The device offers high ingress protection (IP55) that, combined with a range of 30 metres and battery power (CR2430 3 V), allows the transmitter to work from anywhere inside or outside the building.

The transmitter, produced by the renowned Somfy company, operates on the 433.42 MHz frequency. It does not receive feedback from supported devices.
