VarioSon W-868

- **manufacturer: Elero**
- bidirectional radio transmitter for operating blinds and shutters
- controls up to 6 devices or 6 device groups
- wall-mounted device
- manual and automatic mode selection button
- frequency (MHz): 868
- power supply: 1xCR2450 batteries

The VarioSon W-868 is an exceptionally compact yet functional transmitter designed to control external venetian blinds and roller shutters, including screen blinds. The ability to switch between 6 channels means the VarioSon W-868 allows you to control all window blinds and shutters in a small house from a single location.

Why you should recommend the VarioSon W-868 transmitter:

- It's a universal solution for controlling blinds and shutters, provided they use Elero drives.
- It allows you to operate a large number of devices or groups, which, with no significant radio signal obstructions, lets you control the entire house from one place.
- It signals a command with an LED light, so there's never any doubt whether the device is working correctly.

Choose the VarioSon W-868 transmitter if your client:

- Has various types of window blinds (venetian blinds, roller shutters, screen blinds) and would like to control them all from one place.
- Wants to hang the transmitter without the need for an in-wall box, which the VarioSon W-868 doesn't require.
- Needs a device that is as small and discreet as possible, yet offers very high ergonomics despite its compact size.

Learn more about the VarioSon W-868 transmitter:

- Designed to control 6 devices or 6 device groups
- Compatible with solar drives and smart home devices using the same radio protocol, e.g., lighting and heating
