Wireless 2-channel io keyboard

- **communication in io technology**
- intended for garage and property doors
- protection with a 4-6-digit code
- sound and light confirmation of receiving commands
- durable metal housing

Wireless code keyboard for operating garage and entrance gates

The code keyboard using io technology is a convenient and safe way to control access to your home and property without the need to carry a remote control. This wireless device using io technology is secured with a code containing 4 to 6 digits. Commands entered on it are confirmed by a sound and light signal. It can be mounted in any accessible place.
