Ysia Patio io

- **manufacturer: Somfy**
- number of channels: 16
- frequency (MHz): 868-870
- power supply: 2x AAA battery
- available colours: Pure (white) and Anthracite (anthracite)

The exceptionally ergonomic and aesthetic Ysia Patio io remote control with a colour display is a modern solution for the remote control of window coverings and other smart devices supporting the io radio protocol.

High-quality workmanship and well-thought-out device control mechanisms make the Ysia Patio io remote control the perfect choice for people who expect convenient, fully intuitive operation, and advanced users will appreciate its wealth of possibilities.

Why is it worth recommending the Ysia Patio io remote control:

- allows simultaneous control of sixteen devices or their groups operating in io-homecontrol® technology, including roller blinds, blinds, and lighting
- enables precise adjustment of window coverings and artificial lighting intensity thanks to the ergonomic circular regulator
- has a "My" button for saving and later restoring favourite settings

Choose the Ysia Patio io remote control if your client:

- has window coverings and other devices supported by the io radio protocol from Somfy
- expects simple and intuitive operation of all their devices, so that children and the elderly can also use them comfortably
- wants to be able to use the remote control normally in strong sunlight and at night, which is guaranteed by a clear colour display with automatically adjusted brightness

Get to know the Ysia Patio io remote control better:

- io-homecontrol® technology
- compatible with the TaHoma control unit and selected smart home systems
- smooth adjustment of lighting and venetian blind slat angle
- radio range up to 250 m in open space
- dimensions: 170 x 42 x 18 mm
