

Glass Barrier

GLASS EXTERNAL BALUSTRADES,

THAT COMBINE FUNCTIONALITY WITH AESTHETICS.

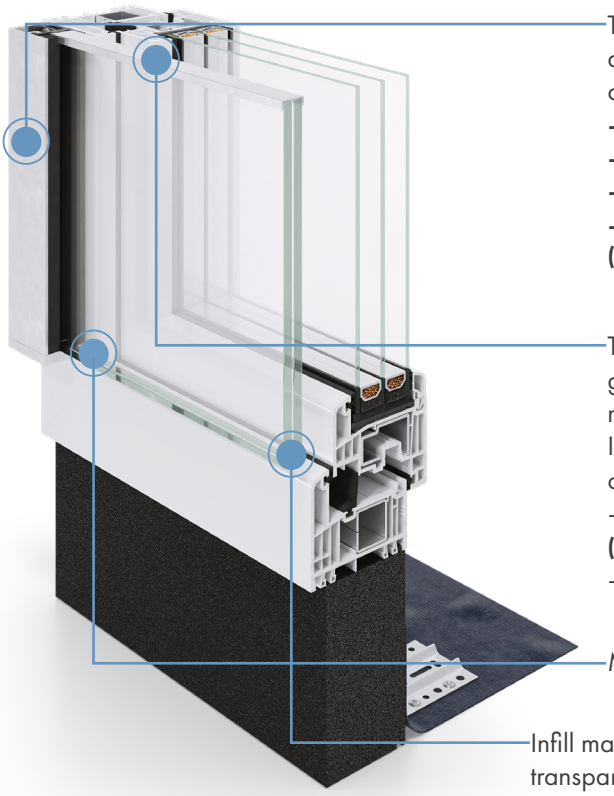

Safety and beautiful views without limits!

The external glass balustrade is used to protect against falling out in „portfolio" type windows, i.e. in high opening windows. Thanks to its transparency, it allows not only the free flow of light, but also the admiration of beautiful views without restrictions.

Functionality and aesthetics

- Installation directly to window profiles in PVC and aluminium systems,
- Height 300 mm and 1200 mm for aluminium systems,
- Height 900 mm and 1000 mm for PVC systems,
- Width up to 3 m.

The guiding rails are available in the following colours:
– white
– anthracite
– black
– EV1 natural anode (silver)

The upper edge of the glass is protected by a strip made of **aluminium.** It is available in two colours:
– **EV1 natural anode (silver)**
– **inox (stainless steel)**

Mounting on the frame

Infill made of tempered, transparent or matt laminated glass **from 12 to 22 mm**

Glass Barrier fixing types:
- standard on anchors
- optional on the profile

Glass Barrier can be combined with single and double-hung windows in systems:

Aluminium	PVC
MB77HS	Ideal 8000
MB86N	BluEvolution 82
MB79N	BluEvolution 92
Genesis	S9000
Ultraglide	Ideal Neo
